

Kasu Naga Veera Venkata Srirama Anudeep

Razole, Andhra Pradesh

9676452859 ✉ anudeepkasu333@gmail.com  [linkedin.com/in/naga-kasu/](https://www.linkedin.com/in/naga-kasu/)

TECHNICAL SKILLS

Languages: C++, Java, C, Python, javascript, SQL

Tools and Technologies: VS Code, GitHub, JUnit, Data Structures and Algorithms, huggingface, kafka, docker, pytorch, opencv, nodejs, Apache Airflow, palantir foundry, pyspark, AWS SQS, AWS Beanstalk, AWS EC2, AWS ECR, AWS SNS, AWS RDS, AWS bedrock, AWS ELB, AWS lambda

Frameworks : reactjs, springboot, hibernate, langchain, langgraph, springMVC, springREST, Express JS

EXPERIENCE

L&T Technology Services

Sep 2024 - Present

Software developer - Bengaluru, Karnataka

Backend & Data Platform (AIRBUS PROJECT - onsite)

- Designed and developed **RESTful APIs** using **Java (Spring Boot)** to expose airline maintenance and operational metrics for frontend dashboards.
- Built **React.js** interfaces to display batch-processing results, fleet accuracy metrics, and maintenance readiness information for airline engineering teams
- Designed and maintained **batch-processing data pipelines** in **Palantir Foundry** using **PySpark** to process large-scale airline maintenance data and compute accuracy/compliance metrics.
- Developed and optimized **Palantir Dossiers** to present operational KPIs, maintenance summaries, and batch-processing insights through interactive dashboards and reports consumed by airline operations teams.
- Integrated Foundry datasets with backend services through **REST APIs**, enabling seamless data flow between analytics pipelines and frontend applications.
- Implemented **AWS Lambda** functions for serverless workflow automation, scheduled data processing, and pipeline orchestration.
- Collaborated with cross-functional engineering and operations teams to design scalable backend services, optimize API performance, and support cloud-based production deployments

Generative AI Engineer

- Delivered AI-driven NLP chatbot solutions for Honeywell using OpenAI GPT-4, Pinecone vector search, and backend API integration for real-time technical query resolution. Developed a YOLOv5-based computer vision watermark detection system for Collins Aerospace with dataset annotation, model fine-tuning, and real-time inference integration. Built RAG-based script generation and MCP-style agent orchestration workflows for Panasonic Avionics to automate playback and announcement operations in aircraft infotainment systems

Pascalcase

Jan 2024 - June 2024

Software Development Intern

Hyderabad, Telangana

- Developed a real-time mortgage dashboard using Power BI and SQL reducing completion time by 30 minutes and boosting customer satisfaction by 15 percent.
- Automated Dynamics 365 CRM workflows with Power Automate and integrated external data via APIs to improve accuracy and efficiency.

EDUCATION

National Institute of Technology Patna, Bihar

Sep. 2020 - May 2024

Bachelor of Technology in Computer Science and Engineering

CGPA: 8.3
